54 Drug-containing protein-bonded liposome.

57 A drug-containing protein-bonded liposome comprising a liposome containing a drug and having maleimide residues on its surface, and a protein and residues of a compound having a polyalkylene glycol moiety, bonded via respective thiol groups to the maleimide residues.

#### INCOMPLETE SEARCH

Claims searched completely : 2,7  
Claims searched incompletely : 1,3-6

In view of the large number of compounds, which are defined by the term "proteinbonded liposome of claim 1, the search had to be restricted for economic reasons. The search was limited to the compounds for which pharmacological data was given and/or the compounds mentioned in the claims, and to the general idea underlying the application (see guidelines, Part B, Chapter III, paragraph 3.6).
